Subject Index

Energy

Rotating Machinery

Compatibility Test and Residual Gas Analysis on 4130 Steel and Methanol Thermosyphons T99-018
Impingement Cooling in Rotating Two-Pass Rectangular Channels with Ribbed Walls T99-053

Thermoelectric

Device Temperature and Heat Generation in Power Metal-Oxide Semiconductor Field Effect Transistors T99-027

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Stagnation-Point Heat Transfer Rates for Pioneer–Venus Probes T99-004
Influence of Nonequilibrium Kinetics on Heat Transfer and Diffusion near Re-Entering Body T99-030

Boundary Layers and Heat Transfer—Turbulent

Combined Convective and Radiative Heat Transfer in Turbulent Tube Flow T99-060

Boundary-Layer Stability and Transition

Spectra and Critical Grashof Numbers for Turbulent Transition in a Thermal Plume T99-010
Computational Study of Hypersonic Transitional Wake Flow T99-033

Computational Fluid Dynamics

Experiment–Modeling Comparison in a Nonequilibrium Supersonic Air Nozzle Flow T99-008
Computational Study of Hypersonic Transitional Wake Flow T99-033
Predictions for Cryogenic Homogeneous Two-Phase Flows in a Choked Laval Nozzle T99-052
BGK–Burnett Equations for Flows in the Continuum-Transition Regime T99-062
Heat Transfer in Natural Convection of Magnetic Fluids T99-074

Hydrodynamics

Viscous Shock-Layer Simulation of Airflow past Ablating Blunt Body with Carbon Surface T99-006
Effect of Nonspherical Shape on Oscillations of Levitated Droplets T99-058

Hypersonic Flow

Calculation of Radiating Flowfield Behind a Reflected Shock Wave in Air T99-005
Kinetics of Free Radicals Behind Strong Shock Waves T99-031
Computational Study of Hypersonic Transitional Wake Flow T99-033
BGK–Burnett Equations for Flows in the Continuum-Transition Regime T99-062
Behavior of Two-Temperature Model in Intermediate Hypersonic Regime T99-064
Experimental and Computational Study of High Enthalpy Double-Wedge Flows T99-065
Heat Transfer in the Melt Layer of a Simple Ablation Model T99-067

Inlet, Nozzle, Diffuser, and Channel Flows

Experiment–Modeling Comparison in a Nonequilibrium Supersonic Air Nozzle Flow T99-008
Non-Arrhenius NO Formation Rate in One-Dimensional Nozzle Airflow T99-054

Multiphase Flows

Nucleate Pool Boiling over Vertical Steps T99-045
Predictions for Cryogenic Homogeneous Two-Phase Flows in a Choked Laval Nozzle T99-052
Surface Temperature of Hydrocarbon Droplet in Evaporation T99-084

Plasmadynamics and MHD

Magnetohydrodynamics Transient Free Convection in Open-Ended Vertical Annuli T99-036
Heat Transfer in Natural Convection of Magnetic Fluids T99-074

Rarefied Flows

Three-Dimensional Monte Carlo Simulations of Plume Impingement T99-032
BGK–Burnett Equations for Flows in the Continuum-Transition Regime T99-062

Reacting Flows and Combustion

Stagnation-Point Heat Transfer Rates for Pioneer–Venus Probes T99-004
Bulk Viscosity: Past to Present T99-049
Thermodynamic and Transport Properties for Inductive Plasma Modeling T99-050
Non-Arrhenius NO Formation Rate in One-Dimensional Nozzle Airflow T99-054
Shock/Viscous Interaction Effects on Nonequilibrium-Dissociated Heating Along Arbitrarily Catalytic Surfaces T99-056
Behavior of Two-Temperature Model in Intermediate Hypersonic Regime T99-064
Interaction of Spalled Particles with Shock Layer Flow T99-066

Shock Waves and Detonations

Kinetics of Free Radicals Behind Strong Shock Waves T99-031
Shock/Viscous Interaction Effects on Nonequilibrium-Dissociated Heating Along Arbitrarily Catalytic Surfaces T99-056
Behavior of Two-Temperature Model in Intermediate Hypersonic Regime T99-064
Experimental and Computational Study of High Enthalpy Double-Wedge Flows T99-065

Transonic Flow

Magnetohydrodynamics Transient Free Convection in Open-Ended Vertical Annuli T99-036

Unsteady Flows

Calculation of Radiating Flowfield Behind a Reflected Shock Wave in Air T99-005

Viscous Non-Boundary-Layer Flows

Experimental and Numerical Study of Thermovibrational Convection T99-022
Bulk Viscosity: Past to Present T99-049
Shock/Viscous Interaction Effects on Nonequilibrium-Dissociated Heating Along Arbitrarily Catalytic Surfaces T99-056
Heat Transfer in Natural Convection of Magnetic Fluids T99-074

Interdisciplinary Topics

Analytical and Numerical Methods

Generalized Finite Element–Harmonic Analysis for Nonlinear Heat Transfer T99-012
Computational Model of Nitrogen Vibrational Relaxation by Electron Collisions T99-029

Interaction of Radiation with Natural Convection T99-059
Combined Convective and Radiative Heat Transfer in Turbulent Tube Flow T99-060

Launch Vehicle and Missile (LV/M) Technology

Testing, Flight and Ground

Spectroscopic Measurements of Shock-Layer Flows in an Arcjet Facility T99-007

Thermal Protection Systems

Spectral Radiative Properties of Open-Cell Foam Insulation T99-042
Gas Permeability of Lightweight Ceramic Ablators T99-057

Propulsion

Airbreathing Propulsion

Heat Transfer Distributions on a Cylinder with Simulated Thermal Barrier Coating Spallation T99-009
Impingement Cooling in Rotating Two-Pass Rectangular Channels with Ribbed Walls T99-053
Impingement Heat Transfer on a Target Plate with Film Cooling Holes T99-077

Droplet Characterization

Surface Temperature of Hydrocarbon Droplet in Evaporation T99-084

Fuels and Propellants, Properties of

Molecular Dynamics Studies of Thermophysical Properties of Supercritical Ethylene T99-051

Space Technology

Space Systems

Sodium Vapor Pressure Losses in a Multitube, Alkali-Metal Thermal-to-Electric Converter T99-014

Spacecraft Contamination/Sterilization

Three-Dimensional Monte Carlo Simulations of Plume Impingement T99-032

Spacecraft Power

Sodium Vapor Pressure Losses in a Multitube, Alkali-Metal Thermal-to-Electric Converter T99-014

Spacecraft Propulsion System Integration

Three-Dimensional Monte Carlo Simulations of Plume Impingement T99-032

Spacecraft Structural Configuration, Design, and Analysis

Generalized Finite Element–Harmonic Analysis for Nonlinear Heat Transfer T99-012

Spacecraft Thermal Management

Startup Time Reduction in an Electrohydrodynamically Enhanced Capillary Pumped Loop T99-016
Mathematical Modeling of Loop Heat Pipes and Experimental Validation T99-046

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

Viscous Shock-Layer Simulation of Airflow past Ablating Blunt Body with Carbon Surface T99-006
Gas Permeability of Lightweight Ceramic Ablators T99-057
Interaction of Spalled Particles with Shock Layer Flow T99-066
Heat Transfer in the Melt Layer of a Simple Ablation Model T99-067

Aerothermodynamics/Thermal Protection

Transient Thermal Analysis of Parallel Translucent Layers by Using Green's Functions T99-001
Spectroscopic Measurements of Shock-Layer Flows in an Arcjet Facility T99-007
Heat Transfer Distributions on a Cylinder with Simulated Thermal Barrier Coating Spallation T99-009
Eley–Rideal and Langmuir–Hinshelwood Recombination Coefficients for Oxygen on Silica Surfaces T99-028
Computational Model of Nitrogen Vibrational Relaxation by Electron Collisions T99-029
Transient Thermal Analysis for Heating a Translucent Wall with Opaque Radiation Barriers T99-040
Thermodynamic and Transport Properties for Inductive Plasma Modeling T99-050
Experimental and Computational Study of High Enthalpy Double-Wedge Flows T99-065
Interaction of Spalled Particles with Shock Layer Flow T99-066
Heat Transfer in the Melt Layer of a Simple Ablation Model T99-067
Characterization of Thin-Film Heat-Flux Gauges T99-082

Boiling/Condensation

Evaporative Heat Transfer in a Capillary Structure Heated by a Grooved Block T99-015
Mixed Convective Boiling Heat Transfer in a Vertical Capillary Structure Heated Asymmetrically T99-044
Nucleate Pool Boiling over Vertical Steps T99-045
Critical Heat Flux Limits for High Velocity, High Subcooling Water Flows T99-047

Computational Heat Transfer

Transient Heat Transfer in a Scattering–Radiating–Conducting Layer T99-002
Permeability Impact on the Pressure Rise in a Pultrusion Die T99-011
Anisotropically Scattering Media Having a Reflective Upper Boundary T99-026
Eley–Rideal and Langmuir–Hinshelwood Recombination Coefficients for Oxygen on Silica Surfaces T99-028
Quasi-Classical Model for Vibrational–Translational and Vibrational–Vibrational Rate Constants T99-063
Coupled Ordinates Method for Multigrid Acceleration of Radiation Calculations T99-069
Mixed-Convection Heat Transfer in Concave and Convex Channels T99-075
Transient Studies of G-Induced Capillary Flow T99-079

Cryogenics

Predictions for Cryogenic Homogeneous Two-Phase Flows in a Choked Laval Nozzle T99-052

Electronics Cooling

Effects of Contact and Spreading Resistance on Heat Sink Cooling Performance T99-021
Device Temperature and Heat Generation in Power Metal-Oxide Semiconductor Field Effect Transistors T99-027
Performance Prediction and Control-System Design of an Aircraft Skin-Cooling Technique T99-034
Aircraft Skin-Cooling Airflow Distribution T99-035
Comparison of Effective Thermal Conductivity and Contact Conductance of Fibrous Composites T99-039
Spreading Resistance of Isoflux Rectangles and Strips on Compound Flux Channels T99-073
Impingement Heat Transfer on a Target Plate with Film Cooling Holes T99-077

Forced Convection

Heat Transfer Distributions on a Cylinder with Simulated Thermal Barrier Coating Spallation T99-009
Performance Prediction and Control-System Design of an Aircraft Skin-Cooling Technique T99-034
Aircraft Skin-Cooling Airflow Distribution T99-035
Impingement Cooling in Rotating Two-Pass Rectangular Channels with Ribbed Walls T99-053
Estimation of Wall Heat Flux in an Inverse Convection Problem T99-061
Mixed-Convection Heat Transfer in Vertical Packed Channels T99-076
Impingement Heat Transfer on a Target Plate with Film Cooling Holes T99-077
Characterization of Thin-Film Heat-Flux Gauges T99-082

Heat Conduction

Interfacial Contact Resistance of Single-Crystal Ceramics for Solar Concentrators T99-013
Effects of Contact and Spreading Resistance on Heat Sink Cooling Performance T99-021
Depth of Thermal Penetration: Effect of Relaxation and Thermalization T99-037
Analytical Comparison of Constant Area, Adiabatic Tip, Standard Fins, and Heat Pipe Fins T99-038
Comparison of Effective Thermal Conductivity and Contact Conductance of Fibrous Composites T99-039
Estimating Temperature-Dependent Thermal Properties T99-048
Thermal Conductivity of Nanoparticle–Fluid Mixture T99-070
Effective Thermal Conductivity of Graphite–Metallic Salt Complex for Chemical Heat Pumps T99-071
Thermal Spreading Resistance in Multilayered Contacts: Applications in Thermal Contact Resistance T99-072
Spreading Resistance of Isoflux Rectangles and Strips on Compound Flux Channels T99-073
Statistical Mechanical Derivation of Cattaneo's Heat Flux Law T99-080
Effect of Insulating Cuffs on an Internally Heated Wire T99-081

Heat Pipes

Evaporative Heat Transfer in a Capillary Structure Heated by a Grooved Block T99-015
Startup Time Reduction in an Electrohydrodynamically Enhanced Capillary Pumped Loop T99-016
Analysis of Supercritical Startup Behavior for Cryogenic Heat Pipes T99-017
Compatibility Test and Residual Gas Analysis on 4130 Steel and Methanol Thermosyphons T99-018
Startup and Transient Performance of a Nb–1%Zr Potassium Heat Pipe T99-019
Analytical Comparison of Constant Area, Adiabatic Tip, Standard Fins, and Heat Pipe Fins T99-038
Mathematical Modeling of Loop Heat Pipes and Experimental Validation T99-046
Transient Studies of G-Induced Capillary Flow T99-079

Laser Interaction

Depth of Thermal Penetration: Effect of Relaxation and Thermalization T99-037

Melting/Solidification

Experiments on Contact Melting Under Vibration Within Rectangular Enclosures T99-024

Mixed Convection

Mixed Convective Boiling Heat Transfer in a Vertical Capillary Structure Heated Asymmetrically T99-044
Mixed-Convection Heat Transfer in Concave and Convex Channels T99-075
Surface Temperature of Hydrocarbon Droplet in Evaporation T99-084

Natural Convection

Effect of Nongray Gas Radiation on Thermal Stability in Carbon Dioxide T99-003
Spectra and Critical Grashof Numbers for Turbulent Transition in a Thermal Plume T99-010
Experimental and Numerical Study of Thermovibrational Convection T99-022
Magnetohydrodynamics Transient Free Convection in Open-Ended Vertical Annuli T99-036
Effect of Surface Radiation on Natural Convection in a Square Enclosure T99-043
Interaction of Radiation with Natural Convection T99-059
Mixed-Convection Heat Transfer in Vertical Packed Channels T99-076

Radiation in Participating Media

Transient Thermal Analysis of Parallel Translucent Layers by Using Green's Functions T99-001
Transient Heat Transfer in a Scattering–Radiating–Conducting Layer T99-002
Effect of Nongray Gas Radiation on Thermal Stability in Carbon Dioxide T99-003
Stagnation-Point Heat Transfer Rates for Pioneer–Venus Probes T99-004
Calculation of Radiating Flowfield Behind a Reflected Shock Wave in Air T99-005
Generalized Finite Element–Harmonic Analysis for Nonlinear Heat Transfer T99-012
Geometric Optics Applied to Rough Surfaces Coated with an Absorbing Thin Film T99-025
Anisotropically Scattering Media Having a Reflective Upper Boundary T99-026
Transient Thermal Analysis for Heating a Translucent Wall with Opaque Radiation Barriers T99-040
Application of Statistical Narrowband Model to Three-Dimensional Absorbing-Emitting-Scattering Media T99-041
Spectral Radiative Properties of Open-Cell Foam Insulation T99-042
Interaction of Radiation with Natural Convection T99-059
Combined Convective and Radiative Heat Transfer in Turbulent Tube Flow T99-060
Analysis of Molecular Gas Radiation: Real Gas Property Effects T99-068
Coupled Ordinates Method for Multigrid Acceleration of Radiation Calculations T99-069

Radiation Interchange Between Surfaces

View Factor for Ring Elements on Coaxial Cylinders T99-020
Satellite Mesh Reflector Temperature Measured by Using Fine Thermocouples T99-023
Geometric Optics Applied to Rough Surfaces Coated with an Absorbing Thin Film T99-025
Effect of Surface Radiation on Natural Convection in a Square Enclosure T99-043
View Factors Between Finite Length Rings on an Interior Cylindrical Shell T99-055
Determination of the Time Constants of Integrating Spheres Using Monte Carlo Simulation T99-083

Thermal Control

Evaporative Heat Transfer in a Capillary Structure Heated by a Grooved Block T99-015
Startup Time Reduction in an Electrohydrodynamically Enhanced Capillary Pumped Loop T99-016
Analysis of Supercritical Startup Behavior for Cryogenic Heat Pipes T99-017
Performance Prediction and Control-System Design of an Aircraft Skin-Cooling Technique T99-034

Aircraft Skin-Cooling Airflow Distribution T99-035
Depth of Thermal Penetration: Effect of Relaxation and Thermalization T99-037
Spreading Resistance of Isoflux Rectangles and Strips on Compound Flux Channels T99-073

Thermal Modeling and Analysis

Transient Heat Transfer in a Scattering–Radiating–Conducting Layer T99-002
Permeability Impact on the Pressure Rise in a Pultrusion Die T99-011
Interfacial Contact Resistance of Single-Crystal Ceramics for Solar Concentrators T99-013
Sodium Vapor Pressure Losses in a Multitube, Alkali-Metal Thermal-to-Electric Converter T99-014
Analysis of Supercritical Startup Behavior for Cryogenic Heat Pipes T99-017
Effects of Contact and Spreading Resistance on Heat Sink Cooling Performance T99-021
Anisotropically Scattering Media Having a Reflective Upper Boundary T99-026
Computational Model of Nitrogen Vibrational Relaxation by Electron Collisions T99-029
Analytical Comparison of Constant Area, Adiabatic Tip, Standard Fins, and Heat Pipe Fins T99-038
Mathematical Modeling of Loop Heat Pipes and Experimental Validation T99-046
Critical Heat Flux Limits for High Velocity, High Subcooling Water Flows T99-047
Quasi-Classical Model for Vibrational–Translational and Vibrational–Vibrational Rate Constants T99-063
Thermal Spreading Resistance in Multilayered Contacts: Applications in Thermal Contact Resistance T99-072
Transient Studies of G-Induced Capillary Flow T99-079
Statistical Mechanical Derivation of Cattaneo's Heat Flux Law T99-080

Thermochemistry and Chemical Kinetics

Eley–Rideal and Langmuir–Hinshelwood Recombination Coefficients for Oxygen on Silica Surfaces T99-028
Influence of Nonequilibrium Kinetics on Heat Transfer and Diffusion near Re-Entering Body T99-030
Kinetics of Free Radicals Behind Strong Shock Waves T99-031
Non-Arrhenius NO Formation Rate in One-Dimensional Nozzle Airflow T99-054
Quasi-Classical Model for Vibrational–Translational and Vibrational–Vibrational Rate Constants T99-063

Thermophysical Properties

Interfacial Contact Resistance of Single-Crystal Ceramics for Solar Concentrators T99-013
Geometric Optics Applied to Rough Surfaces Coated with an Absorbing Thin Film T99-025
Influence of Nonequilibrium Kinetics on Heat Transfer and Diffusion near Re-Entering Body T99-030
Comparison of Effective Thermal Conductivity and Contact Conductance of Fibrous Composites T99-039
Estimating Temperature-Dependent Thermal Properties T99-048
Bulk Viscosity: Past to Present T99-049
Thermodynamic and Transport Properties for Inductive Plasma Modeling T99-050
Molecular Dynamics Studies of Thermophysical Properties of Supercritical Ethylene T99-051
Gas Permeability of Lightweight Ceramic Ablators T99-057
Effect of Nonspherical Shape on Oscillations of Levitated Droplets T99-058
Thermal Conductivity of Nanoparticle–Fluid Mixture T99-070
Effective Thermal Conductivity of Graphite–Metallic Salt Complex for Chemical Heat Pumps T99-071
Thermal Spreading Resistance in Multilayered Contacts: Applications in Thermal Contact Resistance T99-072

Chronological Index

T99-001 Transient Thermal Analysis of Parallel Translucent Layers by Using Green's Functions. Robert Siegel, *NASA Lewis Research Center* (**13**, 1, p. 10) Article

T99-002 Transient Heat Transfer in a Scattering–Radiating–Conducting Layer. Chengcai Yao and B. T. F. Chung, *University of Akron* (**13**, 1, p. 18) Article

T99-003 Effect of Nongray Gas Radiation on Thermal Stability in Carbon Dioxide. J. E. Hutchison, *Fairchild Controls Corporation*; and R. F. Richards, *Washington State University* (**13**, 1, p. 25) Article

T99-004 Stagnation-Point Heat Transfer Rates for Pioneer–Venus Probes. Chul Park and Hyo-Keun Ahn, *Tohoku University, Japan* (**13**, 1, p. 33) Article based on AIAA Paper 98-0832

T99-005 Calculation of Radiating Flowfield Behind a Reflected Shock Wave in Air. Takeharu Sakai, Keisuke Sawada, and Chul Park, *Tohoku University, Japan* (**13**, 1, p. 42) Article based on AIAA Paper 98-0861

T99-006 Viscous Shock-Layer Simulation of Airflow past Ablating Blunt Body with Carbon Surface. Sergey V. Zhluktov and Takashi Abe, *Institute of Space and Astronautical Science, Japan* (**13**, 1, p. 50) Article

T99-007 Spectroscopic Measurements of Shock-Layer Flows in an Arcjet Facility. Chung S. Park, Mark E. Newfield, Douglas G. Fletcher, and Tahir Gökçen, *NASA Ames Research Center* (**13**, 1, p. 60) Article based on AIAA Paper 98-0893

T99-008 Experiment–Modeling Comparison in a Nonequilibrium Supersonic Air Nozzle Flow. A. Bourdon, A. Leroux, P. Domingo, and P. Vervisch, *Université de Rouen, France* (**13**, 1, p. 68) Article

T99-009 Heat Transfer Distributions on a Cylinder with Simulated Thermal Barrier Coating Spallation. Srinath V. Ekkad and Je-Chin Han, *Texas A&M University* (**13**, 1, p. 76) Article

T99-010 Spectra and Critical Grashof Numbers for Turbulent Transition in a Thermal Plume. Katsuhisa Noto, Kenji Teramoto, and Tsuyoshi Nakajima, *Kobe University, Japan* (**13**, 1, p. 82) Article

T99-011 Permeability Impact on the Pressure Rise in a Pultrusion Die. K. S. Raper, J. A. Roux, J. G. Vaughan, and E. Lackey, *University of Mississippi* (**13**, 1, p. 91) Article

T99-012 Generalized Finite Element–Harmonic Analysis for Nonlinear Heat Transfer. Dan Givoli and Omri Rand, *Technion—Israel Institute of Technology* (**13**, 1, p. 100) Article

T99-013 Interfacial Contact Resistance of Single-Crystal Ceramics for Solar Concentrators. S. R. Mirmira and L. S. Fletcher, *Texas A&M University*; and K. W. Baker, *NASA Lewis Research Center* (**13**, 1, p. 110) Article based on AIAA Paper 98-0894

T99-014 Sodium Vapor Pressure Losses in a Multitube, Alkali-Metal Thermal-to-Electric Converter. Jean-Michel Tournier and Mohamed S. El-Genk, *University of New Mexico* (**13**, 1, p. 117) Article

T99-015 Evaporative Heat Transfer in a Capillary Structure Heated by a Grooved Block. Q. Liao and T. S. Zhao, *Hong Kong University of Science and Technology, PRC* (**13**, 1, p. 126) Article

T99-016 Startup Time Reduction in an Electrohydrodynamically Enhanced Capillary Pumped Loop. B. Mo, M. M. Ohadi, and S. V. Dessiatoun, *University of Maryland*; and K. H. Cheung, *U.S. Naval Research Laboratory* (**13**, 1, p. 134) Article

T99-017 Analysis of Supercritical Startup Behavior for Cryogenic Heat Pipes. Y. H. Yan and J. M. Ochterbeck, *Clemson University* (**13**, 1, p. 140) Article

T99-018 Compatibility Test and Residual Gas Analysis on 4130 Steel and Methanol Thermosyphons. Q. H. Leland and R. Ponnappan, *UES, Inc.*; and J. R. Brown, *U.S. Air Force Research Laboratory* (**13**, 1, p. 146) Article based on AIAA Paper 97-2544

T99-019 Startup and Transient Performance of a Nb–1%Zr Potassium Heat Pipe. David E. Glass, *Analytical Services and Materials, Inc.*; Michael A. Merrigan and J. Tom Sena, *Los Alamos National Laboratory*; and Charles J. Camarda, *NASA Johnson Space Center* (**13**, 1, p. 153) Technical Note

T99-020 View Factor for Ring Elements on Coaxial Cylinders. C. P. Tso and S. P. Mahulikar, *Nanyang Technological University, Singapore* (**13**, 1, p. 155) Technical Note

T99-021 Effects of Contact and Spreading Resistance on Heat Sink Cooling Performance. J. G. Maveety, *Intel Corporation* (**13**, 1, p. 158) Technical Note

T99-022 Experimental and Numerical Study of Thermovibrational Convection. R. Monti, R. Savino, and G. Alterio, *University of Naples, Italy*; and R. Fortezza, *Microgravity Advanced Research and Support Center, Italy* (**13**, 1, p. 161) Technical Note

T99-023 Satellite Mesh Reflector Temperature Measured by Using Fine Thermocouples. Akihiro Miyasaka, *NTT Wireless Systems Laboratories, Japan* (**13**, 1, p. 164) Technical Note

T99-024 Experiments on Contact Melting Under Vibration Within Rectangular Enclosures. Liang Quan, Zongqin Zhang, and Mohammad Faghri, *University of Rhode Island* (**13**, 1, p. 166) Technical Note

T99-025 Geometric Optics Applied to Rough Surfaces Coated with an Absorbing Thin Film. Kakuen Tang, Paul A. Kawka, and Richard O. Buckius, *University of Illinois at Urbana–Champaign* (**13**, 2, p. 169) Article

T99-026 Anisotropically Scattering Media Having a Reflective Upper Boundary. C. C. Liu and R. L. Dougherty, *Oklahoma State University* (**13**, 2, p. 177) Article based on AIAA Paper 98-2841

T99-027 Device Temperature and Heat Generation in Power Metal-Oxide Semiconductor Field Effect Transistors. L. Zhu, K. Vafai, and L. Xu, *Ohio State University* (**13**, 2, p. 185) Article

T99-028 Eley–Rideal and Langmuir–Hinshelwood Recombination Coefficients for Oxygen on Silica Surfaces. M. Cacciatore and M. Rutigliano, *University of Bari, Italy*; and G. D. Billing, *University of Copenhagen, Denmark* (**13**, 2, p. 195) Article based on AIAA Paper 98-2843

T99-029 Computational Model of Nitrogen Vibrational Relaxation by Electron Collisions. John D. Mertens, *Trinity College* (**13**, 2, p. 204) Article

T99-030 Influence of Nonequilibrium Kinetics on Heat Transfer and Diffusion near Re-Entering Body. I. Armenise and M.

Capitelli, *University of Bari, Italy*; and E. Kustova and E. Nagnibeda, *St. Petersburg University, Russia* (**13**, 2, p. 210) Article

T99-031 Kinetics of Free Radicals Behind Strong Shock Waves. Djameel Ramjaun, Michel Dumitrescu, and Raymond Brun, *Université de Provence, France* (**13**, 2, p. 219) Article

T99-032 Three-Dimensional Monte Carlo Simulations of Plume Impingement. Keith C. Kannenberg and Iain D. Boyd, *Cornell University* (**13**, 2, p. 226) Article based on AIAA Paper 98-2755

T99-033 Computational Study of Hypersonic Transitional Wake Flow. Robert P. Nance, *North Carolina State University*; Brian R. Hollis and Thomas J. Horvath, *NASA Langley Research Center*; Stephen J. Alter, *Lockheed Engineering and Sciences Company*; and H. A. Hassan, *North Carolina State University* (**13**, 2, p. 236) Article based on AIAA Paper 98-2939

T99-034 Performance Prediction and Control-System Design of an Aircraft Skin-Cooling Technique. Ab Hashemi, Mary Fast, and Julie Schneider, *Lockheed Martin Advanced Technology Center*; and Elizabeth Dyson, *Lockheed Martin Canada* (**13**, 2, p. 243) Article

T99-035 Aircraft Skin-Cooling Airflow Distribution. Julie Schneider, Iran Spradley, and Ab Hashemi, *Lockheed Martin Advanced Technology Center*; Jay Nigen, *Innovative Research, Inc.*; and Elizabeth Dyson, *Lockheed Martin Canada* (**13**, 2, p. 250) Article based on AIAA Paper 98-0839

T99-036 Magnetohydrodynamics Transient Free Convection in Open-Ended Vertical Annuli. M. A. Al-Nimr and M. K. Alkam, *Jordan University of Science and Technology* (**13**, 2, p. 256) Article

T99-037 Depth of Thermal Penetration: Effect of Relaxation and Thermalization. Da Yu Tzou and Kevin K. S. Chiu, *University of Missouri–Columbia* (**13**, 2, p. 266) Technical Note

T99-038 Analytical Comparison of Constant Area, Adiabatic Tip, Standard Fins, and Heat Pipe Fins. W. Jerry Bowman, J. Kirk Storey, and Kenth I. Svensson, *Brigham Young University* (**13**, 2, p. 269) Technical Note

T99-039 Comparison of Effective Thermal Conductivity and Contact Conductance of Fibrous Composites. S. R. Mirmira and L. S. Fletcher, *Texas A&M University* (**13**, 2, p. 272) Technical Note

T99-040 Transient Thermal Analysis for Heating a Translucent Wall with Opaque Radiation Barriers. Robert Siegel, *NASA John H. Glenn Research Center at Lewis Field* (**13**, 3, p. 277) Article

T99-041 Application of Statistical Narrowband Model to Three-Dimensional Absorbing-Emitting-Scattering Media. Fengshan Liu, Gregory J. Smallwood, and Ömer L. Gülder, *National Research Council, Canada* (**13**, 3, p. 285) Article

T99-042 Spectral Radiative Properties of Open-Cell Foam Insulation. D. Baillis, M. Raynaud, and J. F. Sacadura, *Institut National des Sciences Appliquées de Lyon, France* (**13**, 3, p. 292) Article

T99-043 Effect of Surface Radiation on Natural Convection in a Square Enclosure. N. Ramesh and S. P. Venkateshan, *Indian Institute of Technology* (**13**, 3, p. 299) Article

T99-044 Mixed Convective Boiling Heat Transfer in a Vertical Capillary Structure Heated Asymmetrically. T. S. Zhao and Q. Liao, *Hong Kong University of Science and Technology, PRC* (**13**, 3, p. 302) Article

T99-045 Nucleate Pool Boiling over Vertical Steps. John Baker and Krishna Prasad A. K., *University of Alabama at Birmingham* (**13**, 3, p. 308) Article based on AIAA Paper 99-0471

T99-046 Mathematical Modeling of Loop Heat Pipes and Experimental Validation. Tarik Kaya, *NASA Goddard Space Flight Center*; and Triem T. Hoang, *TTH Research, Inc.* (**13**, 3, p. 314) Article based on AIAA Paper 99-0477

T99-047 Critical Heat Flux Limits for High Velocity, High Subcooling Water Flows. D. A. Greisen, D. C. Rousar, and W. R. Thompson, *Aerojet* (**13**, 3, p. 321) Article based on AIAA Paper 97-2912

T99-048 Estimating Temperature-Dependent Thermal Properties. Kevin J. Dowding, *Sandia National Laboratories*; James V. Beck, *Michigan State University*; and Ben F. Blackwell, *Sandia National Laboratories* (**13**, 3, p. 328) Article based on AIAA Paper 98-2933

T99-049 Bulk Viscosity: Past to Present. Rick E. Graves and Brian M. Argrow, *University of Colorado* (**13**, 3, p. 337) Article based on AIAA Paper 98-2576

T99-050 Thermodynamic and Transport Properties for Inductive Plasma Modeling. Benoît Bottin, David Vanden Abeele, Mario Carbonaro, and Gérard Degrez, *von Kármán Institute for Fluid Dynamics, Belgium*; and Gabbita S. R. Sarma, *DLR, German Aerospace Research Center* (**13**, 3, p. 343) Article based on AIAA Paper 98-2938

T99-051 Molecular Dynamics Studies of Thermophysical Properties of Supercritical Ethylene. Obika C. Nwobi, Lyle N. Long, and Michael M. Micci, *Pennsylvania State University* (**13**, 3, p. 351) Article

T99-052 Predictions for Cryogenic Homogeneous Two-Phase Flows in a Choked Laval Nozzle. Ibrahim Sinan Akmandor, *Middle East Technical University, Turkey*; and Toshio Nagashima, *University of Tokyo, Japan* (**13**, 3, p. 355) Article based on AIAA Paper 98-0889

T99-053 Impingement Cooling in Rotating Two-Pass Rectangular Channels with Ribbed Walls. Kumar V. Akella and Je-Chin Han, *Texas A&M University* (**13**, 3, p. 364) Article

T99-054 Non-Arrhenius NO Formation Rate in One-Dimensional Nozzle Airflow. G. Colonna, M. Tuttafesta, and M. Capitelli, *Consiglio Nazionale delle Ricerche, Italy*; and D. Giordano, *ESA, The Netherlands* (**13**, 3, p. 372) Technical Note based on AIAA Paper 98-2951

T99-055 View Factors Between Finite Length Rings on an Interior Cylindrical Shell. C. P. Tso and S. P. Mahulikar, *Nanyang Technological University, Republic of Singapore* (**13**, 3, p. 375) Technical Note

T99-056 Shock/Viscous Interaction Effects on Nonequilibrium-Dissociated Heating Along Arbitrarily Catalytic Surfaces. George R. Inger, *Iowa State University* (**13**, 3, p. 379) Technical Note based on AIAA Paper 98-2814

T99-057 Gas Permeability of Lightweight Ceramic Ablators. Jochen Marschall, *NASA Ames Research Center*; and Michael E. Cox, *San Jose State University* (**13**, 3, p. 382) Technical Note

T99-058 Effect of Nonspherical Shape on Oscillations of Levitated Droplets. Arturo A. Fuentes and Yildiz Bayazitoglu, *Rice University* (**13**, 3, p. 384) Technical Note

T99-059 Interaction of Radiation with Natural Convection. C. K. Krishnaprakas and K. Badari Narayana, *ISRO Satellite Center,*

India; and Pradip Dutta, *Indian Institute of Science* (**13**, 3, p. 387) Technical Note

T99-060 Combined Convective and Radiative Heat Transfer in Turbulent Tube Flow. C. K. Krishnaprakas and K. Badari Narayana, *ISRO Satellite Center, India*; and Pradip Dutta, *Indian Institute of Science* (**13**, 3, p. 390) Technical Note

T99-061 Estimation of Wall Heat Flux in an Inverse Convection Problem. Hung-Yi Li and Wei-Mon Yan, *Hua Fan University, Taiwan, ROC* (**13**, 3, p. 394) Technical Note

T99-062 BGK–Burnett Equations for Flows in the Continuum-Transition Regime. Ramesh Balakrishnan, Ramesh K. Agarwal, and Keon-Young Yun, *Wichita State University* (**13**, 4, p. 397) Article based on AIAA Paper 97-2551

T99-063 Quasi-Classical Model for Vibrational–Translational and Vibrational–Vibrational Rate Constants. Yu. E. Gorbachev, *Institute for High-Performance Computing and Data Bases of Russian Ministry of Science and Technologies*; and F. Mallinger, *Institut National de Recherche en Informatique et en Automatique, France* (**13**, 4, p. 411) Article

T99-064 Behavior of Two-Temperature Model in Intermediate Hypersonic Regime. Michiko Furudate, Satoshi Nonaka, and Keisuke Sawada, *Tohoku University, Japan* (**13**, 4, p. 424) Article based on AIAA Paper 99-0223

T99-065 Experimental and Computational Study of High Enthalpy Double-Wedge Flows. Joseph Olejniczak, Graham V. Candler, and Michael J. Wright, *University of Minnesota*; and Ivett Leyva and Hans G. Hornung, *California Institute of Technology* (**13**, 4, p. 431) Article based on AIAA Paper 96-2238

T99-066 Interaction of Spalled Particles with Shock Layer Flow. Chul Park, *NASA Ames Research Center* (**13**, 4, p. 441) Article based on AIAA Paper 99-0353

T99-067 Heat Transfer in the Melt Layer of a Simple Ablation Model. Tse-Fou Zien, *U.S. Naval Surface Warfare Center*; and Chin-Yi Wei, *National Cheng-Kung University, Taiwan, ROC* (**13**, 4, p. 450) Article based on AIAA Paper 99-0470

T99-068 Analysis of Molecular Gas Radiation: Real Gas Property Effects. K. C. Tang and M. Q. Brewster, *University of Illinois at Urbana–Champaign* (**13**, 4, p. 460) Article

T99-069 Coupled Ordinates Method for Multigrid Acceleration of Radiation Calculations. S. R. Mathur, *Fluent, Inc.*; and J. Y. Murthy, *Carnegie–Mellon University* (**13**, 4, p. 467) Article based on AIAA Paper 99-0872

T99-070 Thermal Conductivity of Nanoparticle–Fluid Mixture. Xinwei Wang and Xianfan Xu, *Purdue University*; and Stephen U. S. Choi, *Argonne National Laboratory* (**13**, 4, p. 474) Article

T99-071 Effective Thermal Conductivity of Graphite–Metallic Salt Complex for Chemical Heat Pumps. Jong Hun Han and Kun-Hong Lee, *Pohang University of Science and Technology, Republic of Korea*; and Hwayong Kim, *Seoul National University, Republic of Korea* (**13**, 4, p. 481) Article

T99-072 Thermal Spreading Resistance in Multilayered Contacts: Applications in Thermal Contact Resistance. Y. S. Muzychka, M. R. Sridhar, and M. M. Yovanovich, *University of Waterloo, Canada*; and V. W. Antonetti, *Manhattan College* (**13**, 4, p. 489) Article based on AIAA Paper 96-3967

T99-073 Spreading Resistance of Isoflux Rectangles and Strips on Compound Flux Channels. M. M. Yovanovich, Y. S. Muzychka, and J. R. Culham, *University of Waterloo, Canada* (**13**, 4, p. 495) Article based on AIAA Paper 98-0873

T99-074 Heat Transfer in Natural Convection of Magnetic Fluids. H. Yamaguchi, I. Kobori, and Y. Uehata, *Doshisha University, Japan* (**13**, 4, p. 501) Article

T99-075 Mixed-Convection Heat Transfer in Concave and Convex Channels. F. Moukalled and A. Doughan, *American University of Beirut, Lebanon*; and S. Acharya, *Louisiana State University* (**13**, 4, p. 508) Article

T99-076 Mixed-Convection Heat Transfer in Vertical Packed Channels. W. L. Pu, *University of Hawaii*; and P. Cheng and T. S. Zhao, *Hong Kong University of Science and Technology, PRC* (**13**, 4, p. 517) Article

T99-077 Impingement Heat Transfer on a Target Plate with Film Cooling Holes. Srinath V. Ekkad, *Louisiana State University*; and Yizhe Huang and Je-Chin Han, *Texas A&M University* (**13**, 4, p. 522) Article

T99-078 Aircraft Skin-Cooling System for Thermal Management of Onboard High-Power Electronics. Ab Hashemi, *Lockheed Martin Missiles and Space*; Elizabeth Dyson, *Lockheed Martin Canada*; and Jay Nigen, *Innovative Research, Inc.* (**13**, 4 , p. 529) Article

T99-079 Transient Studies of G-Induced Capillary Flow. M. K. Reagan, *U.S. Air Force Institute of Technology*; and W. J. Bowman, *Brigham Young University* (**13**, 4, p. 537) Article based on AIAA Paper 94-2029

T99-080 Statistical Mechanical Derivation of Cattaneo's Heat Flux Law. Abdulmuhsen H. Ali, *Kuwait University* (**13**, 4, p. 544) Technical Note

T99-081 Effect of Insulating Cuffs on an Internally Heated Wire. C. Y. Wang, *Michigan State University* (**13**, 4, p. 546) Technical Note

T99-082 Characterization of Thin-Film Heat-Flux Gauges. Frank K. Lu and Kevin M. Kinnear, *University of Texas at Arlington* (**13**, 4, p. 548) Technical Note based on AIAA Paper 98-2504

T99-083 Determination of the Time Constants of Integrating Spheres Using Monte Carlo Simulation. Zhaoyan Zhang, *Pennsylvania State University* (**13**, 4, p. 550) Technical Note

T99-084 Surface Temperature of Hydrocarbon Droplet in Evaporation. A. Daïf, M. Bouaziz, J. Bresson, and M. Grisenti, *Université de Perpignan, France* (**13**, 4, p. 553) Technical Note
